I understand and agree that health and accident insurance policies are an arrangement between my insurance company and myself -- not between my insurance company and this office. I agree to pay my estimated patient responsibility and further understand that the estimated responsibility is neither a guarantee of payment by my insurance company, nor necessarily an accurate reflection of my actual responsibility as determined by my insurance company upon processing of my claims. In the event that my insurance company does not pay on my charges at the estimated rate or within a reasonable period of time, upon request of this office I will immediately pay the balance owing on my account unless otherwise agreed to in writing. I understand that an interest charge may appear on all accounts over 90 days. I further understand and agree, that if this office must take any action to collect an outstanding balance on my account, I will be responsible for payment and will reimburse this office for all costs of such collection efforts, including, but not limited to, all court costs and attorney fees. I authorize this office to release any medical information relating to my treatment to any insurance companies which may be responsible for paying benefits to me, and to any attorney s who may be representing me due to my condition, and to complete any usual and customary reports and forms at no charge to assist in collecting from my insurance companies, attorneys, or other payers. I have read, understood, and agree to the foregoing. The information which I have provided is true and complete to the best of my knowledge

X-Ray Consent & Statement of Non-Pregnancy

X-rays are one way of looking inside a person's body. Chiropractors use X-ray analysis as one of the tools that help tell if your body is properly balanced and if your vertebrae and other skeletal structures are in proper alignment. This helps us determine your structural integrity.

Long-standing spinal nerve stress (vertebral subluxations) may cause a condition of inflammation of the bone and related structures and premature aging called spinal degeneration. An X-ray can tell us if you have this condition.

If you have read the above information and give the doctor and his/her associates permission to perform an Xray evaluation.

Consent to Treatment

Patients Name: _____ Date: _____

The Nature of Chiropractic Treatment: The doctor will use his/her hands or a mechanical device in order to move your joints. You may feel a "click" or "pop", such as the noise when a knuckle is "cracked", and you may feel movement of the joint. Various ancillary procedures, such as hot or cold packs, electric muscle stimulation, therapeutic ultrasound, manual therapy, therapeutic stretching and strengthening, traction, decompression may also be used.

Possible Risks: As with any health care procedure, complications are possible following chiropractic manipulation. Complications could include fractures of bone, muscular strain, ligamentous sprain, dislocations of joints, or injury to intervertebral discs, nerves, or spinal cord. Cerebrovascular incident could occur upon severe injury to arteries of the neck, but evidence is inconclusive. A minority of patients may notice stiffness or soreness after the first few days of treatment. The ancillary procedures could produce skin irritation, burns or minor complications.

Probability of Risks Occurring: The risks of complications due to chiropractic treatment have been described as "rare" and generally result from underlying structural weakness or disease. The risk of cerebrovascular incident has been the subject of ongoing medical research and debate and is inconclusive as to a specific incident of this complication occurring. If there is a casual relationship at all it is extremely rare and remote. The probability of adverse reaction due to ancillary procedures is also considered "rare".

Other Treatment Options: Any patient is within their right to consult other medical professions and not dependent on referral from this office. However, if other treatment is chosen, there are risks and benefits that should be discussed with the medical professional. Other options may include but are not limited to self-administered care, over the counter medication, rest, medical care with prescriptions and/ or procedures, hospitalizations, etc.

Risks of Remaining Untreated: Delay of treatment allows formation of adhesions, scar tissue and other degenerative changes. These changes can further reduce skeletal mobility and induce chronic pain cycles. It is quite probable that delay of treatment will complicate the condition and make future rehabilitation more difficult. I understand that my doctor at Kenney Family Chiropractic, Inc. cannot make any promises or guarantees regarding a cure for or improvement in my condition.

I understand that my doctor will share with me his opinion regarding potential results from chiropractic treatment for my condition and will discuss treatment options with me before I consent to treatment. I have read the explanation above of chiropractic treatment. I have had the opportunity to have any questions answered to my satisfaction. I have fully evaluated the risks and benefits of undergoing treatment. I have freely decided to undergo the recommended treatment, and hereby give my full consent to treatment.

PLEASE DO NOT SIGN UNTIL YOU HAVE READ AND UNDERSTAND THE ABOVE. PLEASE INITIAL AND SIGN THE APPROPRIATE BLOCKS BELOW.

I have read (___) or have been read (___) the above explanation of the chiropractic adjustment and related treatment. I have discussed it with Justin Kenney, D.C. and have had my questions answered to my satisfaction. Having been informed of the risks, I hereby give my full consent to that treatment.
